

# DO YOU

## REALLY NEED TO USE BOX PARTITIONS?

### COMPARING WHEN PEOPLE USE BOX PARTITIONS TO WHEN THEY DON'T

No Partition

Partition

Shipping items without using partitions leaves them unprotected.

The lack of dividers and cushioning can cause cracks, scratches, and even breaks.

The items you've shipped have become dirty, cracked, or broken, and no one is happy.

Shipping items with partitions better protects them from damage.

Box dividers and separators cushion the objects and separate fragile items from each other.

The items you've shipped were perfectly protected and everyone involved is happy.
